

## DATA SHEET

### CT 200 Vacuum Collection Tank

Serial numbers: **S0117403-1** and **S0117410-2**

Length	14'-3" (Shipping position)
Height	7'-2" (Shipping position)
Width	6'-4" (Shipping position)
Width	6'-4" (Working position)
Length	7'-2" (Working position)
Height	14'-3" (Working position)
Weight	3,200 lbs. (Completely empty)

#### Features:

Vessel is rated for 30" HG (vacuum). Not rated for pressure.  
Capacity, 200 cubic feet of (100 lbs. per cubic foot abrasive) abrasive.  
8" abrasive dump valve on bottom of vessel.  
Vessel can be used in conjunction with a collection tank stand to elevate the dump valve.  
4", 5" or 6" suction (vacuum) inlet.  
4", 5" or 6" grit (recovery) inlet.  
12" x 16" Manway for interior access.  
Exterior ladder.  
Certified, gross weight lifting eyes for handling with overhead crane.  
Lifting eyes (empty weight) on the shell of the tank for handling when in the shipping position.

#### Notes:

1. Not intended to be laid on its side with abrasive in the vessel.
2. Recovery hose and hose to connect vacuum to collection tank not supplied.
3. Optional high-level probe shut down circuit for vacuum producer may be available.
4. Collection tank must be stood upright with a crane at the job site.
